Canadian Karting Regulations BULLETIN 10-02

SUBJECT: USE OF CAMERAS ON KARTS

EFFECTIVE DATE: July 16, 2010

ASN does not object to the use on cameras on karts during track sessions.

We have however observed cameras being mounted in unacceptable locations and with less than adequate mounting methods. Some cameras being used are not suitable for the motorsports use.

The only camera approved for mounting on a kart is the GoPro HD Motorsports HERO camera. Product information available at www.goprocamera.com.

Only one camera can be mounted on a kart installed as indicated below. It is not permitted to mount a camera on a helmet or any other location other than shown below.

The mounting location is on the front panel. The installation kit must be fixed horizontally, in the middle axis, and 250 mm from the upper edge of the front panel.

The camera mount hardware attachment to the front panel is as shown below.

- 1 camera housing with support
- 2 M5x16 screws
- 2 washers
- 2 self-locking nuts

The only mount mechanism to be used is the portion of GoPro GRBM30 Roll Bar Mount kit shown by the arrow on the left.
