

WRKC Rule Bulletin

Effective April 17, 2014

The Waterloo Regional Kart Club has issued this bulletin in regards to **Rule 37.5**

37.5 The correct valve spring part number to be used is 14751-883-000 available through Honda Canada. When sourced through Honda Canada the label and package will state "Made in JAPAN".
Warning: There are other springs in Honda packaging with the same part number that are entering Canada through different suppliers and look very similar, except that the package will state: "Made in THAILAND". These springs are not available through Honda Canada and are therefore illegal.

Example of valve springs available through Honda Canada:

Example of valve springs that have been imported from elsewhere:
