

WRKC Rule Bulletin

Effective June 4, 2014

The Waterloo Regional Kart Club has issued this bulletin in regards to **Rule 41.5**

Rule 41.5 - Spark Plugs

Spark plug is to be standard reach $\frac{3}{4}$ " plug.

There must be a washer/gasket min.003" in place on the plug or temp sensor probe
Measurement from seat of the spark plug, not including gasket, to the end of the 14mm threaded area, to be .770" maximum.

Ground electrode extending past the last thread will be single-wire side electrode type.

No multiple electrodes or full circumference ground electrodes will be permitted.

This rule is to eliminate the intent to defeat the CC rule, by displacing more combustion space with the spark plug.
